### Period for Reply

A SHORTENED STATUTORY PERIOD FOR REPLY IS SET TO EXPIRE 3 MONTH(S) OR THIRTY (30) DAYS, WHICHEVER IS LONGER, FROM THE MAILING DATE OF THIS COMMUNICATION.

- Extensions of time may be available under the provisions of 37 CFR 1.136(a). In no event, however, may a reply be timely filed after SIX (6) MONTHS from the mailing date of this communication.
- If NO period for reply is specified above, the maximum statutory period will apply and will expire SIX (6) MONTHS from the mailing date of this communication.
- Failure to reply within the set or extended period for reply will, by statute, cause the application to become ABANDONED (35 U.S.C. § 133). Any reply received by the Office later than three months after the mailing date of this communication, even if timely filed, may reduce any earned patent term adjustment. See 37 CFR 1.704(b).

### Status

TRADEMARKS

Paper No:20061026  
Application No:10/775233  
Filing Date: February 11,2004

1. The Abstract of the Disclosure is objected to because line 2, "comprises", must be deleted. Correction is required. See M.P.E.P. § 608.01(b).

Applicant is reminded of the proper language and format of an Abstract of the Disclosure.

The abstract should be in narrative form and generally limited to a single paragraph on a separate sheet within the range of 50 to 250 words. It is important that the abstract not exceed 250 words in length since the space provided for the abstract on the computer tape used by the printer is limited. The form and legal phraseology often used in patent claims, such as "means" and "said", should be avoided. The abstract should describe the disclosure sufficiently to assist readers in deciding whether there is a need for consulting the full patent text for details.

The language should be clear and concise and should not repeat information given in the title. It should avoid using phrases which can be implied, such as, "The disclosure concerns," "The disclosure defined by this invention," "The disclosure describes," etc.

2. The following is a quotation of the appropriate paragraphs of 35 U.S.C. 102 that form the basis for the rejections under this section made in this Office action:

A person shall be entitled to a patent unless –

(b) the invention was patented or described in a printed publication in this or a foreign country or in public use or on sale in this country, more than one year prior to the date of application for patent in the United States.

3. Claims 1,7 are rejected under 35 U.S.C. 102(b) as being anticipated by Kraft (4529065).

Art Unit: 2837

Kraft teaches in figures 1-4, an elevator system with door opening control in a powered and power fail situation.

FIG. 2

- 1) Doors 26 (hatchway doors are not shown) are operated in a powered situation to open when in a landing zone. Lock control 57 and door control 56 operate to lock the doors when not in the landing zone. If for example, the power fails, the doors may be opened to a predetermined limit 96 (figure 3) position but not unlocked unless actuated by a passenger (lock release) which allows the doors to be unlocked and the cage 12 is in a predetermined distance 3-4 inches or larger from the landing.

A further mechanical override 110 is also used but is keyed and actuated by authorized personnel.

Art Unit: 2837

- 7) Solenoid 64 and capacitor 170 supply a one shot unlock of the doors when actuated.
4. Claims 2-6 are objected to as being dependent upon a rejected base claim, but would be allowable if rewritten in independent form including all of the limitations of the base claim and any intervening claims.

The specifics of the manual actuator for the lock release including the trigger plate and push roller are not taught or reasonably suggested by the cited art of record.

The prior art made of record and not relied upon is considered pertinent to applicant's disclosure. Gibson et al., Morris, Young et al and Dewhurst are cited to illustrate similar elevator door emergency release mechanisms.

A shortened statutory period for response to this action is set to expire 3 months from the date of this letter.

Failure to respond within the period for response will cause the application to become abandoned. 35 U.S.C. 133

Any inquiry of a **general nature** should be directed to the **Group receptionist whose telephone number is (571) 272-2800.**

**Information regarding the STATUS of an application may be obtained from the Patent Application Information Retrieval (PAIR) system.
